

Download

A: There's a good free emulator called Winkawaks that's quite easy to use and has a very simple interface. You can download all the ROMs in your hard drive in a few seconds using just 2 clicks, and you can replay the game on your computer using the emulator. To do that, you can just click Download Image button and select the ROM in your image list. After that, you just have to make a small menu on the File menu and select the Game you want to play. If you press Play, you'll start the game. If you have a few, like the 3D fighters of the 90s, you'll

have to expand your ROM's size, as well as the image list. And Winkawaks is very easy to use in that case, as you can find lots of the information you need on the official website.
